PREFACE

The WVRL Statistical Handbook is published with the object of providing a concise, convenient and usable source of selected statistical facts and figures relating to state and local government in West Virginia. It is provided as a public service to the citizens of West Virginia and others interested in our State.

Volumes of detailed compilations of statistics on government finance and administration are issued periodically by state and federal agencies. While these publications are important and necessary for official and private researchers of governmental problems, they are cumbersome and time-consuming to use. The WVRL Statistical Handbook is intended to provide an accessible and easy-to-use initial reference source. It provides reliable information for businessmen, public officials, students, teachers, editors, interested citizens and others who have need for West Virginia statistics, but may lack the time or facilities to search widely-scattered publications for this information.

As indicated by the footnotes following each table, the information contained herein was obtained from official sources, and, occasionally from respected private research organizations. Where comparable data was available statistics for a ten-year period are provided. The latest year available is always shown, but may vary depending upon the accessible data.

The data contained in this Statistical Handbook are basic. The WVRL has neither attempted to make comparisons nor identify trends. Interpretation and analysis of this information, therefore, is left entirely to the user. Anyone requiring additional or more detailed information than is contained herein is invited to contact the offices of the West Virginia Research League.

In preparing the Statistical Handbook, the WVRL has received valuable assistance from many state and federal agencies. We take the opportunity here to convey our sincere appreciation to the officials and staff of these agencies for their interest and cooperation.

Material contained in this publication is intended for public use and permission is hereby granted to reproduce, cite or directly quote information in the Statistical Handbook without formal request. The League will appreciate a credit line stating "Reprinted by permission of the West Virginia Research League," when material is taken directly from this publication, or that information is credited to the West Virginia Research League when indirect reference is made.

THE WEST VIRGINIA RESEARCH LEAGUE

The West Virginia Research League, incorporated in 1969, is a nonprofit educational organization which conducts research into state government problems and provides factual studies and reports to public officials as an aid to improving the governmental process.

The Research League's role is to serve the public interest through its independent analysis of serious state problems. The League brings its findings to the attention of the decision-makers in government without any obligation to them. No part of the League's activities involve attempting to directly influence legislation.

Under the terms of its Charter, the League generally undertakes studies for governmental departments and legislative committees upon their request. Completed studies are customarily released to the public and to the news media by the official agency which requested them and these reports then may be obtained from the WVRL.

The Research League reserves the right, however, to initiate reports on issues of public concern and to publish educational information such as that contained in **Economic Indicators,** and in this Handbook, in further fulfillment of its public education responsibility.

In sum, the primary functions of the West Virginia Research League are:

To research, study and analyze public issues of significance to West Virginia; to compile and publish its findings in a clear, objective, and non-partisan form; and, to provide its reports to the departments and agencies of the government of West Virginia.

To cooperate with public officials in working for the adoption of improved public administration systems and procedures in West Virginia government.

To be a fact-finding organization whose activities serve to broaden the channels of credible communication, and thus enhance the maintenance of responsible relationships between those who govern and those who are governed; and, to serve materially to advance West Virginia's economic and social development.

The League's research programs and public activities are made possible by the contributions of its members, which include a representative cross-section of West Virginia business firms and foundations. Organizations, private foundations and individuals subscribing to the principles summarized above are cordially invited to inquire about League membership.
